Inclusion matters

Siân Williams
All children have an entitlement to education

All children have the capacity to make progress
Policies

Resources
The global situation
'Inclusion and equity in and through education is the cornerstone of a transformative education agenda, and we therefore commit to addressing all forms of exclusion and marginalization, disparities and inequalities in access, participation and learning outcomes. No education target should be considered met unless met by all.'
• 12 years of publicly-funded quality primary and secondary schooling for all

• Equal opportunities for all to access education and to learn, paying particular attention to vulnerable groups

• Relevant and effective learning outcomes, including, at a minimum, foundational literacy and numeracy skills that provide the building blocks for further flexible lifelong learning opportunities.
Some stark facts:

In some countries, it will take another 2 generations to secure universal primary education

263 million children and young people remain out of school

Around 40% of people are not taught in a language they speak or fully understand

100 million children leave school without having learnt the basics
Why does inclusion matter?

Improving these figures would:

• Reduce working poverty
• Reduce crime in cities
• Improve gender equality
• Improve health and reduce fertility rates
• Help us keep up with demand
Think of a time when you felt included in a group or an activity. How did this make you feel? How did you behave?

Think of a time when you felt excluded from a group or an activity. How did this make you feel? How did you behave?
What do we mean by inclusion in schools?

“Every child included”

“Education for all”

“No child left behind”
“More schools meeting the needs of more children”
It is not a destination at which we arrive, it’s a road upon which we travel
How can we become more inclusive?

What are the essential components of an inclusive school or classroom?
Securing availability of provision:

ACCESS

Ensuring what is being accessed is relevant & empowering:

ENGAGEMENT
Access and engagement are the two major components of an inclusive school or classroom.

They should be the basis of how you evaluate your inclusive provision and how you monitor its success.
Access and engagement are not necessarily finance-driven solutions. They can be equally driven by innovation and creative thinking.
POLICY

CULTURE

PRACTICE
The policy bit
Our school policy is...

What this child needs is...
So what’s needed?

Leaders at all levels with:
• Clear, strong core values around inclusion
• Clarity of vision and the ability to communicate it
• High-trust, supportive relationships with teachers, students and families
• The commitment to walk their talk
• Tenacity and perseverance

Adapted from McLeskey, J and Waldron, N (2015)
ENGAGEMENT

The practice bit
Knowing

Believing

Doing

Adapted from Rouse, M (2008)
PRACTICE

• Teaching and learning – how; what
• Classroom organisation and management
• SEND
• Assessment for learning
• Where to go for help
• Policy and law
• Confidence to try different strategies

• Intensive professional development that supports *doing* (not just *knowing*)

• Good relationships with students and families

• Modelling

• Tenacity and perseverance
• All children can learn and are worth educating

• I have the capacity to make a difference
The pervading **attitudes** towards inclusion in the school or organisation.

The extent to which **behaviours** support or undermine the development of inclusive practice at system & school level.

The will and **commitment** in the school or organisation system that pushes the inclusion agenda forwards.
THE MEDICAL MODEL OF DISABILITY

IMPAIRMENTS AND CHRONIC ILLNESS
often pose real difficulties but
- they are not the main problems

THE INDIVIDUAL

Considering your current situation, which model underpins your policy, practice and culture?
Unconscious bias refers to a bias that we are unaware of, and which happens outside of our control. It is a bias that happens automatically and is triggered by our brain making quick judgments and assessments of people and situations, influenced by our background, cultural environment and personal experiences.
Who holds the power?
Who makes the rules?
Who carries them out?
Who do they benefit?

Social relationships and power
Summary
we are almost there
Everyone needs to be clear about the definition of inclusion and understand that it is a process and not a destination.

Inclusion this way!
Access & engagement are the guiding principles.

It is important to recognise what obstacles are in the way and how to overcome them.
Culture is key.

In particular, social models of thinking are better than medical models bringing about more sustainable change.
“If you want change, you have to be an agent of change.”

Primary school teacher, Malawi, 2017
